Weber Florence Creek CWMU Description

The Weber Florence CWMU is located on the boundary of Uinta County, Wyoming and Summit County, Utah. The Unit is mainly in three parts, the south two parts are only joined by a common corner. Higher elevation in the north like Porcupine Peak is 9100 feet, in the middle part, 9800 feet; and in the south **10500 feet**. Chalk Creek (**6700 feet** to 9500 feet) forms much of the north part's border, originating in the middle Unit. Basin Creek (7100 feet to 7700 feet) cuts the north part. Humpy Creek (9100 feet to 9400 feet) cuts the south part of the middle part. Although not the border of the Unit, the Weber River (7400 feet to 7800 feet) flows near the south border. Larrabee Creek (7700 feet to 9800 feet) and Moffit Creek (7800 feet to 9200 feet) flow into the Weber River on the south part of the Unit.

The two (2) main land cover types on the Weber Florence Creek Cooperative Wildlife Management Unit (CWMU) are Inter-Mountain Basins Montane **Sagebrush Steppe** (62) and Rocky Mountain **Aspen Forest and Woodland** (22). The CWMU is generally divided into three large parcels. The northern most parcel is heavily influenced by **Oil Well** development and the southern most parcel is influenced by Rocky Mountain **Alpine Bedrock and Scree** (2). The general area is also influenced by meadows and spruce-fir forest.
